

LUIS ALBERTO ORTIZ MEZA

CTO & Solution Architect | Full-Stack Expert | Applied AI

CDMX | Merida (relocating) • luis@zoga.com.mx • zoga.com.mx • mrcalamitus.com • linkedin.com/in/mrcalamitus

> /whoami

Cloud Solutions Architect and Technical Leader with **15 years of experience** designing large-scale systems. Specialist in the convergence of **Software, Hardware, and AI**, focused on taking generative AI to **production**: systems that sustain real operations, not demos.

As **CTO and Founder of ZOGA**, I combine deep technical expertise (Full-Stack, Cybersecurity, AWS) with strategic thinking (**CFO mindset**): architectures that maximize ROI and operational efficiency.

Hardware + Software + AI · Scale & resilience · Product leadership · Entrepreneurial grit · CFO mindset

> /seeking

Looking for challenges where AI is applied natively: built into the core of consumer-ready products and services — not as a demo or an add-on, but as the engine of the business.

> /portfolio

Certisep SaaS / Legal-Tech

Role: Solutions Architect & CTO

End-to-end system for generating, validating, and managing electronic degrees and certificates for private institutions (IPES). Regulatory compliance and advanced cybersecurity.

AI implementation — outcomes

- Trained and lead a team of **4 people** in AI adoption: AI-assisted development, client retention and acquisition strategies, and document analysis.
- Designed, deployed, and continuously improve **multi-agent prospecting pipelines** (CrewAI + Ollama, local models on Linux): from **0 to 80 weekly website visits** and **2–5 qualified prospects per week**.
- Reaching our end clients used to take **weeks** the traditional way; it now happens in **days**, iterating and improving week over week.
- Evaluated generative video AI and specialized in **HeyGen** to produce Certisep's commercial content.

Digipris GovTech / Health Regulation

Role: Architect & Lead Developer

Online health regulation platform linked to COFEPRIS. Digitization of regulatory procedures and compliance for the healthcare sector.

Iaprep Ed-Tech / AI

Role: CTO & AI Strategist

AI-powered electoral platform with advanced analysis capabilities, RAG architecture, and natural language processing.

// Legacy **Upperbus & Rideupp** — Co-founder of collective and on-demand mobility startups. Product leadership, cross-functional teams, city-level operations, and regulatory adaptation.

> /ai_lab (personal project)

Hermes — Personal assistant on a local LLM. Evaluated and put into operation a Hermes-based assistant that keeps me up to date on my WhatsApp groups, tracks my monthly expenses, and searches daily for news, articles, references, and development opportunities.

> /toolbox

Infrastructure & Cloud

- AWS (EC2, S3, Lambda, RDS)
- Google Cloud / Firebase
- Docker · Terraform
- Linux + Zsh

Development & AI

- Python · Node.js
- OpenAI / LLM · RAG
- CrewAI (multi-agent)
- Ollama (local LLMs)
- HeyGen (AI video)
- Security by Design

Leadership & Methods

- Technical leadership
- Strategic planning
- Agile / Scrum
- Technical mentoring
- AI-augmented teams

> /education

Master's Degree in Cybersecurity · Software / Computer Engineering

"Engineering the bridge between code, hardware, and profitability."
